LOCAL NEWS

Harry Doling was a visitor to Three Hills and Trochu this week. Ask Shorty, when he gets back, if he met any pretty girls.

Albert Hey finished painting the wood work on the Farmers Exchange building.

The Provincial election last Monday took place with great enthusiasm and the part of the U. F. A. men. The results were more in favor of the farmers than was generally anticipated. Some wizards will tell you, "I knew it," but the average man with common sense was expecting a farmer victory, but not as great as it really turned out. The new government has a hard task ahead and we all hope sincerely that they will make good. Now that elections are over and the country has given its verdict, it is the duty of everyone who calls himself a citizen to be true and loyal to the new government.

The following is a list of the votes cast in this district.

Present Economic Waste

Why do prices of merchandise and commodities of all kinds remain so abnormally high despite the fact that the war demand is long since past and production in almost every line has overtaken requirements? This is a question asked by hundreds of people. It is generally known that prices of raw materials have fallen, yet when one comes to buy the finished product into which these raw materials have been converted, the price asked is practically the same as during the war. What is the reason? The answer may be largely expressed in one word: Waste.

It is universally recognized that the prevailing high freight rates operate directly to increase the price of all goods, first by increasing the price of the raw materials and secondly by still higher charges on the finished article. One of the chief factors responsible for high freight rates is: Waste. Here are a few illustrations of this waste of which complaint is made:

Before the United States Government took over the railways of that country for operation during the war the comparatively simple job of changing a nozzle tip in the front end of a locomotive could be done by a machinist, or a machinist and helper, or even a handy man alone. Today under the present classification rules governing the labor unions, in order to change a nozzle tip it is necessary to call a boilermaker and his helper to open the door, because that is boiler-makers' work; to call a pipeman and his helper to remove the blower pipe, because that is pipeman's work; and to call a machinist and his helper to remove the tip, because this is machinists' work; also for the same force to be employed for putting in the new tip.

Prior to Federal control of the railways in the United States it was not an uncommon practice for a machinist and his helper to take care of all of the work necessary on an electric headlight of a locomotive. Under the McAdoo Agreement the work is now so classified as to distribute the same among three crafts, namely, machinists, sheet metal workers and electricians. If each of the mechanics performing the work has a helper, this has the effect of six men performing a piece of work that could be and was formerly taken care of by two men.

Under present rules where arrivals of trains require the service of employees two hours in the morning and two hours in the evening, say 8 a.m. to 10 a.m. and 6 p.m. to 8 p.m., railroads now have to employ two shifts of eight hours each, or sixteen hours service where there is only four hours' actual work. Furthermore, where two such shifts are worked the starting time must be between 7 and 8 a.m., and if the arrival of a train or other operating conditions require a man on duty at 6 a.m. he must be paid for five hours each day in addition to regular eight-hour day.

The following illustrates the method of paying a wrecking crew under the McAdoo Agreement when performing road service: A wrecking crew composed of six men leaves its home terminal at 8 a.m., goes a distance of 50 miles to clear up a wreck; work of clearing main track is completed at 6 p.m.; crew ties up for sleep and rest from 6 p.m. to 7 a.m. next morning (wrecking outfit is equipped with sleeping facilities); resume duty 7 a.m.; pick up refuse and arrive at home terminal 2 p.m. Under the National Agreement it is necessary to pay the entire crew continuously for the first 24 hours from the time they leave their home terminal, computed as follows:

From 8 a.m. to 4 p.m., eight hours straight time; 4 p.m. to 12 midnight, eight hours of time and one-half, or 12 hours; 12 midnight to 8 a.m., eight hours at double time, or 16 hours; 8 a.m. to 2 p.m., six hours at straight time. Total of 42 hours paid, although crew actually performed service from 12 noon to 6 p.m. first day, six hours, and from 7 a.m. to 10 a.m., second day, three hours. It will be noted actual time worked during the entire period was nine hours; balance of the time was consumed in waiting and travelling, and it will be further noted the crew was released entirely from 6 p.m. to 7 a.m., during which time they were paid at time and one-half and double time while actually off duty and sleeping.

Scores of other instances of a like character, all of which are substantiated by an exhaustive inquiry into the subject, could be given. The above however goes to show the enormous economic waste taking place daily in connection with railway work, which waste must be paid for, and is being paid for, by the people in excessive freight and passenger rates. These high rates are reflected again in the unduly high cost of goods of all kinds.

The truth of the matter is that in paying the excessively high rates which the railway companies find it necessary to charge, the people are paying, not for services rendered, but to cover vicious economic waste, paying men for work they do not do and for services which are not performed. The whole system is wrong and is doing even greater injury to those who fancy they are profiting by it because it is encouraging shiftlessness and downright dishonesty which finds expression in accepting pay for work never performed.

Near Bingen, in Germany, is a famous echo which will toss a sound and fro no less than seventy times. Some seventy periodicals printed in Esperanto, the so-called universal language, are now published.

"There's a Reason"

The British Way

Upholds Officials Who Speak For Nation Without Authorization.

Speaking of the reprimand administered to Rear-Admiral Sims by United States Secretary Denby for his denunciation of American Sinn Feiners and of utterances made by Admiral McGruder regarding the United States' attitude towards France, the New York Times points out, by way of contrast, that the British Government does not check up its officials when they presume to speak for the nation without direct authorization. The Tribune recalls that in Cuba a British consul who threw the British flag over Americans facing a firing squad was not reprimanded. Nor was Captain Chichester reprimanded in Manila Bay when he intervened between Admiral Dewey and the German squadron, virtually challenging Germany to war if an attack was made upon the American ships.

If the whole of the watery vapor in the atmosphere were to fall at once in the form of rain it would not, according to experts, cover the entire surface of the earth to a depth of more than five inches.

ADVICE FOR BACKACHE

When stooping hurts, when lifting and bending causes distress that's the time to rub in lots of "Nerviline." Usually a couple of applications brings grateful relief. No liniment more soothing, more certain to kill muscular, rheumatic or sciatic pains. Thousands of homes rely on good Old Nerviline for cramps, colic, dysentery, and external muscular pains. Large 35 cent bottles for sale everywhere.

Something more than a century ago paper was so dear in England that butchers used to give their customers the meat wrapped up in a large vegetable leaf.

To Asthma Sufferers. Dr. J. D. Kellogg's Asthma Remedy comes like a helping hand to a sinking swimmer. It gives new life and hope by relieving his trouble—something he has come to believe impossible. Its benefit is too evident to be questioned—it is its own best argument—its own best advertisement. If you suffer from asthma get this time-tried remedy and find help like thousands of others.

Wonderful powers of memorizing facts are possessed by a Yorkshire laborer, who has mentally stored away 31,000 items of general information.

As a vermicide an excellent preparation is Mother Graves' Worm Exterminator. It has saved the lives of countless children.

The vibrations of sound caused by spoken words can now be recorded by means of a clever invention.

CHOLERA INFANTUM

Cholera infantum is one of the fatal ailments of childhood. It is a trouble that comes on suddenly, especially during the summer months, and unless prompt action is taken the little one may soon be beyond aid. Baby's Own Tablets are an ideal medicine in warding off this trouble. They regulate the bowels and sweeten the stomach and thus prevent all the dread summer complaints. Concerning them Mrs. Fred Rose, of South Bay, Ont., says: "I feel Baby's Own Tablets saved the life of our baby when she had cholera infantum and I would not be without them." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Canadian Receives French Medal

Corporal Rescued Woman From Well Nineteen Feet Deep. Corporal David Mills, London, a former member of the British Air Force, has been awarded a medal by the "Foundation Carnegie" of Paris, France. In 1918 when the English airmen were at Frailis bombing the Rhine cities, Mills one night saw a number of excited people standing at a farm gate. He learned that a woman had fallen 19 feet into a well filled with water 50 feet deep. Single handed he brought the woman to the surface though he had been told it meant death to go into the shaft and that she was doubtless dead before he had arrived.

W. N. U. 1377

Lucky He Took Wife's Advice At Time He Did, Says This Regina Man

"I was going down hill pretty fast when I began taking Tanlac, but I can say for this medicine that it turned me right round and put me back on the road to health," said William Lorenz, 2154 McKay St., Regina.

"I suffered a great deal more from the after-effects of influenza than I did from the disease itself, as it left me in a run-down condition. My stomach was upset and I had a sick and depressed feeling most of the time. Nothing I ate agreed with me. My kidneys bothered me considerably and my back ached so that I could not bend over and straighten up again without suffering agony.

"It was a lucky day for me when my wife persuaded me to take Tanlac. It changed me all around in a

surprisingly short time. It gave me an appetite and put my stomach in perfect condition so that nothing I eat disagrees with me. My kidneys do not bother me any more and my back is entirely free from pain. I gained fifteen pounds in weight, too, while taking Tanlac and just feel like a different person.

"Seeing what Tanlac did for me, dozens of our friends are taking it and they are just as enthusiastic as my wife and I are. We intend always to keep a bottle in the house so that if any of the family need building up we can give it to them at once. "I feel that it is nothing but my duty to tell others about this medicine which does so much good."

Tanlac is sold by leading druggists everywhere.

Extension of Can- ada's Seed Trade.

During the year 1920 Canada's export seed trade made a considerable advance, owing in no small degree to the efforts of the Dominion Department of Agriculture and the Department of Trade and Commerce. The Canadian Trade Commissioners supplied lists of prospective customers abroad for Canadian seed. These were communicated with and their requirements placed before Canadian exporters. In this way an increased export of seeds was brought about to the United States, Great Britain France and Newfoundland. To Ireland along approximately 100,000 bushels of fibre flax seed, worth about \$1,000,000, was exported. In British Columbia, field root and garden vegetable seeds, amounting to 150,000 pounds, were marketed through the United Seed Growers, Limited, Penticton B.C. Some 75,000 pounds of mangel, swede turnips, and field carrot seed, grown by the Experimental Farms, were sold at current wholesale prices to farmers' organizations and individual farmers. It was deemed advisable to confine the marketing of this seed to Canada, so farmers might have the exclusive advantage of using this high quality seed. Circulars detailing the available seed potato supplies in Prince Edward Island, Nova Scotia, New Brunswick, and Quebec proved an important factor in relieving the shortage in Ontario. Demonstration conducted on 117 farms in Ontario and Quebec with mangel and swede turnip seed resulted in showing the superiority of home grown seed over foreign.

Seed laboratories are now maintained by the Dominion Department of Agriculture at Ottawa, Winnipeg, Calgary, and at those points some 28,000 tests were carried out. Samples of wheat, oats, barley, timothy, and clover were tested for vitality and, at Calgary, investigation was made into the effect of frost on germination.

(Continued.)

"It's out of the question," said McCrae. "Besides, it's not so necessary as you think. What with the bad time our train made, an' the good time the stock-train made, an' the fact that they started ahead of us, they're in the yards now. That's a piece of luck, to start with. 'S nothing unusual for settlers to be held up here two an' three weeks waiting for their freight, an' all the time bills piling up an' cash running down in a way that knocks holes in their pockets."

"But I can't put my wife in a stock-car!" protested Harris.

"There's worse places," McCrae answered, calmly worrying a considerable section from a plug of black chewing tobacco. "Worse places, Ah should say. Ah've seen times when a good warm stock car would have passed for heaven. But that ain't what Ah have in mind. We'll all turn in an' get the stock unloaded, hitch up the horses, pack a load, an' get away. Morrison's hired man'll drive his team, an' Tom'll stay here himself an' look after the rest of the stuff. Ah've been making a canvass, an' Ah find we have six or seven families who can be ready to pull out this afternoon. An soon as we get into settled country, perhaps we can get accommodation, such as it is, along the way. But my team will go along, with a good tent an' some cooking outfit. Everyone has bedding, so we're all right for that. Now, if we all hustle we can be started by four o'clock, an' out ten or twelve miles before we pitch camp. That's far enough for the horses the first day, anyway. How does it suit you?"

"What do you say, Mr. Morrison?"

"I think Aleck's plan is best. I've my wife and the two girls, and there's no roof for their heads here. I can find a place for myself, but I've got to them started. Ned is a trusty man; he will drive my team. It suits me."

"But after we get there?" said Harris. "For my part, I don't know where I'm going. Even with Aleck's help it will take some time to look up my land and build a place to live in. Mind you," he said, as if forestalling a question in their minds, "I'm mightily obliged for the kindness of your offer, and it isn't myself I'm thinking about."

"Hoots, man!" said Morrison. "We ken who you're thinkin' about, right well. And a poor man y'd be if ye didn't, for a bonnier lass never came out of Canada, and that's saying somethin'. But she'll be all right out there, and a deal better than if you left her here. There's not many settlers with houses in the country yet, Aleck tells me, but there's a few, and it's wonderful the easiness of a shanty on the prairie."

"Tom's right," said McCrae. "We haven't many of the conveniences of civilization out there yet, but we haven't the narrowness or vice either, an' your wife'll be both welcome an' safe in any farmer's home. Now, if it's all settled," continued McCrae, who had the leader's knack of suppressing indecision at the psychological moment, "we'll all turn in with the unloading of the stock."

Harris ran to tell his wife that they were to join a party for "the front" that very afternoon. She received the news joyously. Her only fear

CHECK YOUR BOWEL TROUBLES

BY USING
DR. FOWLER'S
EXTRACT OF
WILD STRAWBERRY

When you are troubled with diarrhoea, dysentery, colic, cramps and pains in the stomach, cholera, cholera morbus, summer complaint, bloody fluxes, or any looseness of the bowels be sure and obtain a bottle of "Dr. Fowler's" and see how quickly it gives you relief. This wonderful remedy has been on the market for the past 76 years and we wish to warn you against accepting a substitute which may be dangerous to your health.

Mr. Samuel Buckler, Tatamagouche, N.S., writes:—"While visiting in Western Canada I had a severe attack of diarrhoea. After trying many proprietary medicines I got no relief but kept getting worse."

I was advised to take Dr. Fowler's Extract of Wild Strawberry, and I lost no time in doing so. I cannot hesitate in recommending it most highly, for when I had not yet taken half the bottle I was relieved. I must say that if "Dr. Fowler's" is given a fair trial it will show its good qualities."

The price of the genuine is 50c a bottle; put up only by The T. Milburn Co., Limited, Toronto, Ont.

W. N. U. 1377

Liniments Won't Relieve Pain Between The Eyes

That pain is not rheumatism or neuralgia. Many folks think so—it is due to Catarrh, plain ordinary Catarrh and needs attention right now. Catarrh is the name of a wonderful invention that is daily fixing up chronic cases of weak throat, bronchitis and catarrh. Every breath through the Inhaler is laden with soothing, healing substances that destroy all diseased conditions in the breathing organs. It can't fail to help, because it goes where the trouble really exists—and doesn't attempt to cure an illness in the head or throat by means of medicine taken into the stomach. There is no sufferer from a grippy cold or any winter ill that won't find benefit in Catarrh, which is employed by physicians, ministers, lawyers and public men throughout many foreign lands. Large size lasts two months and costs \$1.00. Small sizes 50c, sample size 25c, all storekeepers or the Catarrhzone Co., Montreal.

had been that she would be left behind during the weeks in which her husband made his exploration of the country.

In a few minutes all hands, both men and women, were busy at the cars. The horses, stiff and sore after their long journey, stalked rheumatically down the gangway. Feeling solid ground beneath their feet, they shook their heads vigorously, as though to rid them of the rumble of the cars, and presently were rolling and stretching in the warm sun. Dogs jumped with muddy paws and boisterous affection upon masters and mistresses; cows lowed, roosters crowed, and pigs emitted little grunts of that supreme happiness peculiar to their race. Many hands made the work light, and by mid-afternoon six sleighs were loaded for the journey. All the women and children were to go with the party; Morrison and one or two hired men would remain in Emerson, complete the unloading, and take charge of the effects until the teams should return from their long journey. McCrae, on account of his knowledge of the town and of the needs of the journey, was chosen to secure the supplies. His own team, which had wintered at Emerson, was to take the lead, and in his sleigh were a large tent, some cooking equipment, and an assortment of catables, consisting mainly of dried meat, lard, beans, molasses, bread, flour, oatmeal and tea. McCrae provided his team and equipment without charge; the cost of the provisions was reckoned up and divided among the immigrants in their various proportions to the whole party.

Each settler's sleigh carried that which seemed most indispensable. First came the settler's family, which, large or small, was crowded into the deep box. McCrae made them pack hay in the bottom of the sleigh-boxes, and over this were laid robes and blankets, on which the immigrants sat, as thickly as they could be placed. More robes and blankets were laid on top, and sacks stuffed very full of hay served the double purpose of cushioning their backs and conveying fodder for the animals. Such space as remained was devoted to grain for the horses, bundles of clothing and boxes of dishes, kitchen utensils, and family effects. In one of the sleighs a pig was quartered, and in another a crate of hens which poked their heads stupidly through the cracks, blinking at the bright light. Behind the sleighs were tethered the cattle.

Morrison came up to Harris's sleigh, and gave it an approving inspection.

"You will all be fine," he said, "and a great deal better than we're in about here. Besides, you're just as well to be away," he added, in a somewhat lower voice. "McCrae tells me if this sun keeps up the roads will be gone before we know it, and that means a delay of two or three weeks. There's been a tremendous snow this winter, and a steady thaw, what with these north-running rivers, means floods on the low-lying lands, and perhaps in the town itself, McCrae tells me he's none too sure about the bridge."

At this moment McCrae himself joined the group. "There's only two in your party, Harris," he said, "an' while Ah don't want to interrupt your honeymoon, there's another passenger to be taken care of. Dr. Blain is going with us, and Ah'm going to put him in your charge. He's a bit peculiar, but Ah don't think he'll give you any trouble. It's just a case of being too much of a good fellow. One thing Ah know—he's a doctor. Saw him last fall on a scarlet fever job. Settler's sod shack, twenty miles from nowhere. Three children down, mother down, father frantic. Well, Ah know that Blain camped right there in the thick of it; doctor, nursed, cooked, kept house—did everything. An' they're all of 'em alive an' well to-day, or were when last Ah saw them. So he's worth more'n a speaking acquaintance, Harris; you may know that better some day. Ah'm going up town for him now; you can shift your stuff a little an' make room."

The whole party were ready for the road and waiting before McCrae appeared again. When he came a companion staggered somewhat uncertainly by his side.

"I'm aw'right," McCrae he was

saying. "I'm aw'right. Shay, wash this? Shildren 'v Ishrul?" "Come now, Doctor, straighten up. Ah want to introduce you." "Introdush me? Thash right. Make me 'equainted with the ladish. How juhdo, Princhess?" he said, stopping and gesticulating before an imaginary figure. "Thish is Dr. Blain, late of—late of—was it that, McCrae? Oh, very good. I'm aw'right."

Half leading and half pulling, McCrae at last brought the doctor to Harris's sleigh. "Sorry he's in this shape," he whispered. "He'll likely go to sleep, an' be all right when he wakes up. Ah can't take him in my sleigh, an' Ah feel sure you can handle him."

"I'll do the best I can," said Harris, though he was little pleased with the prospect.

"Straighten up, Doctor," said McCrae, giving him a good poke in the ribs. "This is Mr. Harris, who you will travel with—Jack Harris. An' Mrs. Harris."

The doctor had glanced only casually at Harris, but at the mention of the woman's name he straightened up and stood alone.

"Glad to meet you, madam," he said. "And it's only proper that the pleasure should be all mine." There was a little bitterness in his voice that did not escape her ear.

"But indeed I am glad to meet you," she answered. "Mr. McCrae has been telling us something of your work among the settlers. We are very fortunate to have you with us."

He shot a keen look into her face. She returned his gaze frankly, and he found sarcasm neither in her eyes nor her voice.

"Help me in, McCrae," he said. "I'm a bit unsteady. . . . There now, my bag. Don't move, Mrs. Harris. . . . I think we are quite ready now, are we not?"

"Most remarkable man," whispered McCrae to Harris. "Wonderful how he can pull himself together."

McCrae hurried to his own sleigh, called a cheery "All ready!" and the party at once proceeded to get under way. This was not accomplished without difficulty. The cattle showed no disposition to follow the sleighs, but hung back, pulling on their ropes with amazing strength. One or two, in an excess of stubbornness, sat down in the snow and had to be dragged bodily. The settlers had three or four dogs along, but it was not considered safe to let them get at the cattle, lest the frightened animals should break their ropes and occasion further delay. The situation was only relieved by a number of men following behind, prodding vigorously and twisting the tails of the most recalcitrant. Presently the cows began to swing along, and, finding that no harm befell them, they soon settled into a slow but steady gait, and gave no more trouble until they began to tire with their travel.

The horses, too, had their own difficulties. Jaded and nervous with their long trip in the cars, and strange to the air and surroundings, they fidgeted and fretted, and soon the sweat-line was creeping up their backs. The sleigh trails stood high over the level of the surrounding prairie, and the horses were continually slipping off. The snow packed in hard balls under their feet, and at intervals the drivers were obliged to get out and clear it away. The March sun, which had shone down with such fierce heat during the middle of the day, now swung far to the westward, facing the travellers over an ocean of snow stretching away into the unknown. The day grew colder; women and children drew blankets tighter about them, and huddled lower in the sleighs to escape a sharp wind that slipped silently down from the north, carrying a ground-drift of icy particles in its breath.

Children Cry for Fletcher's

CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

Air Bicycle Is Latest Invention

Flies Thirty-Five Feet, Three Feet From Ground.

The air bicycle has arrived. Gabriel Poulain recently won the 10,000 franc prize offered for the first flight to be made in an aeroplane propelled by manpower.

For the first time, in history an aeroplane has been flown with no motive force other than that supplied by a pair of legs.

Poulain made three flights—or rather loops. The longest was about 35 feet. He managed to get about three feet off the ground in making this hop. Scientists who watched him compared his performance with the first attempt at aviation when motor propelled planes trundled around on the ground with occasional leaps into the air.

Poulain's vehicle looks like a bicycle with planes and a propeller. To win the money he had to make a flight of more than ten yards. While the crowd looked on, he pedaled furiously along the field and finally flew clear of the ground.

Poverty would soon die out if babies were permitted to select their parents.

A man is seldom as old as he feels or a woman as young as she says she is.

A Valuable Discovery

New Method of Treating Hydro-Magnesite Will Benefit B.C.

A new method of calcining hydro-magnesite has been discovered by C. D. Oliver, of Vancouver. The first deposit of this product, of which British Columbia has a monopoly, is at Watson Lake, near Vancouver. Other parts of Central and Northern British Columbia are rich with the same and similar deposits—soda, epsom salts, etc. The new method of calcining has been proved to be an undoubted success and this will obviate the necessity of importing improved magnesite from California and elsewhere.

The Chinese pen is a brush made of soft hair, which is best adapted for painting the curiously-formed letters of the Chinese alphabet.

Importance Of The Conference On Limitation of Armaments

Meeting at Washington Will be Attended by Many of the
World's Prominent Statesmen.

London.—Indications in semi-official circles are that an international conference giving every promise of developing into one of the most important in the history of the world is in store for the immediate future.

Great Britain, France and Italy have thus far officially signified their willingness to accept invitations of President Harding to a conference on limitations of armaments, while China has indicated her readiness to participate in a conference relative to Eastern affairs.

In Government circles it appears to be the consensus of opinion that the meeting at Washington will be attended by some of the most prominent

statesmen of the world. The announcement of Premier Briand of France, that he would consider going to Washington, followed indications that Prime Minister Lloyd George might also go, provided conditions in Great Britain are such as to permit his extended absence from the country. It is probable, however, that some of the leading figures in British official life will be present. Among those mentioned as delegates are: Rt. Hon. A. J. Balfour, Lord President of the Council of the League of Nations; Lord Lee, of Fareham, First Lord of the Admiralty; Sir Laming Worthington-Evans, Secretary for War; Admiral Lord Beatty and Viscount Grey.

Hail Swept Areas

Heavy Damage Reported In South
Alberta and Saskatchewan.

Lethbridge.—Later reports of the hailstorm which struck Southern Alberta last week indicate that it was much wider in extent than first reports showed. The storm gathered in the foothills west of Claresholm and swept in a south-easterly direction through the Claresholm, Nobleford, Coaldale and Chin districts, swinging south through Skiff, on the Lethbridge-Weyburn branch of the C.P.R.

The storm varied in width from one to three miles and the loss of the crop in its path was nearly complete. The length of the storm path was approximately a hundred miles.

All crops but two on the C.P.R. and the Van Horne soldier colony, north of Coaldale in the irrigated belt, were wiped out. Chickens were killed by the force of the storm in some districts.

Damage from hail in an extensive area is found to have resulted from the recent storm in Southern Saskatchewan. The area hailed is said to extend intermittently from Shaunavon to Weyburn. The district seven miles south from Assiniboia and south of Limerick is said to be most seriously affected. Sixty thousand dollars in insurance claims is reported filed in Limerick.

Several areas are said not to have been insured. The extent of the damage is as much as seventy to eighty per cent. in places.

Japan's Chief Concern

Wonders If She Can Hold Her Own
If Isolated.

San Francisco.—"The Anglo-Japanese alliance has been revised twice since its conclusion in 1902, but the fundamental spirit underlying the pact has never changed," says a statement issued in Tokio by the Kokuminto political party and published in the Yomiuri, copies of which were received here recently.

"The question that claims the serious consideration of the Japanese at this moment is not whether Japan will be isolated when the alliance is dropped, but whether Japan has any confidence in her capacity to hold her own in the future, even if she should find herself temporarily in an isolated condition."

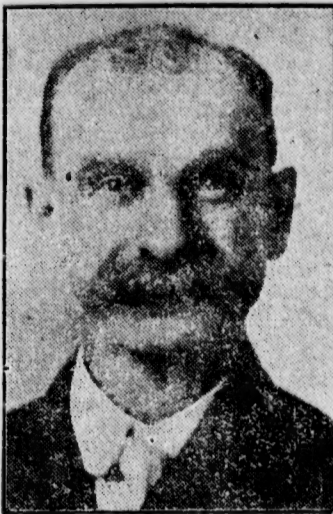

The New Agriculture

Outlines Vision of New Future for
Agriculture in the West.

Saskatoon.—The agricultural societies convention at the University of Saskatchewan was completed this afternoon when Prof. W. J. Rutherford, dean of the College of Agriculture, addressed the gathering on "The New Agriculture," and Prof. A. M. Shaw gave an address on "Livestock—its place in Saskatchewan agriculture."

The Dean outlined the vision of the new agriculture which was gradually coming into existence in the west. The new agriculture would be profitable, productive, comfortable, beautiful and educational. The boys would not want to leave the farms then, he declared.

Journal, Emerson, Man.

B. C. Lumber Mill Destroyed By Fire

Costly Blaze at Gilroy-McKay Plant,
Port Alberni.

Port Alberni, B.C.—Fire completely destroyed the Gilroy-McKay lumber mill with a loss in plant alone estimated at \$75,000. A million and a half feet of lumber was lost.

The Canadian Voyager was berthed at the mill loading 550,000 feet of lumber for Quebec points. Both cargo and vessel were saved.

Some cars of lumber caught fire and sustained heavy damage. One house caught fire but was saved. The cause of the fire is unknown. Owing to a brisk wind it spread rapidly. Fire fighters from both Port Alberni and Alberni were quickly on the scene but could do little to check the spread of the flames and most of the time was occupied in protecting nearby residences.

Anti-British Film Will Be Produced

To Be Exhibited By Author Who
Served Prison Term.

New York.—Robert Goldstein, who in 1917 was sentenced to ten years imprisonment for violation of the Espionage Act in connection with the authorship and production of a 13-reel film known as "The spirit of '76," a work of propaganda to arouse animosity in the United States against the British Government, has had his sentence commuted and been released after serving three years. He announced that he intends to exhibit the film and has hired a hall in this city.

Britain Cares Building Subsidies

Plan to Encourage House Building
Produced 200,000 Dwellings.

London.—The British Government has stopped the granting of subsidies to encourage house building, a policy entered into since the war in an endeavor to overcome the housing shortage. It is estimated that the government scheme has produced 200,000 dwellings and entailed liabilities of ten million pounds annually. To this heavy indebtedness on account of current rent, a large capital loss will have to be added, when, at the expiration of the seven years, the properties will be revalued for transfer to the local authorities.

Was In Strange Company

London.—Premier Meighen found himself in somewhat strange company at the Eighty Club. Right Hon. H. H. Asquith sat at his left and proposed his health, while all around him were the leading lights of anti-Lloyd George Liberalism. Mr. Asquith, in his address, ventured far into British controversial politics, introducing the Irish question, the disarmament conference and the conference of Empire Prime Ministers, but Premier Meighen, who followed and who received an almost tumultuous welcome, avoided going beyond the border of non-partisan problems.

Early Days In The Hudson's Bay Service

By O-GE-MAS-ES (Little Clerk).

(Copyrighted)

It was early summer of 1878 and rather to my disgust I was held up at Cumberland House (the headquarters for the H. B. Co. in that district), waiting for a passage to Grand Rapids. Every available able-bodied man had been engaged by the company, either for the arduous trip to Long Portage, with outfits for the Mackenzie River district, or else on the river steamers.

A missionary's wife with three little girls had just come in from the north en route for the Red River; a poor Scotchman with a brae in his bonnet had been sent in from an outpost with a long report showing that the isolation had been too much for him, and though not dangerous he was considered a sort of mild lunatic. It was decided to send him in to Fort Garry for medical examination. All of these people made extra months to feed, and the Chief Factor suggested that I take them down to Grand Rapids by York Boat and there connect with the steamer Colwil on Lake Winnipeg. I was quite agreeable to this, providing some sort of crew could be found, and after a good deal of enquiry, old Antoine Moran turned up, he having come in by the Brochet boats. This French half-breed had been poisoned some years before by the Indians and the effect still showed every summer in the peeling of the skin off his face and hands, the latter being so tender he could only do light work and that with gloves. However, I was glad to get him as he was an excellent steersman and knew the river. Then there was a young imp of an Indian lad named Kitchemokomon—(Big Knife) a devil for mischief, and the bourgeois was only too glad to get rid of him. This was all my crew, but of course we had the current of the river in our favor, for we could not possibly stem it. This was truly a motley crowd and I shuddered to think what would become of us all if we happened to take the wrong channel, as we simply had no power to return. It took eight good men to pull a York boat up-current on the Saskatchewan. As usual the issue of provisions for our trip was scanty enough, therefore I smuggled in an old fish net in case of being storm bound, as there was thirty miles of Cedar Lake to cross, and straight fish diet was a long way better than nothing.

Having been on the Lower Saskatchewan for some years I was well equipped against mosquitoes, and such mosquitoes—quite beyond the imagination of any one who has not been there. The whole country for many miles is inundated in the spring, and as this recedes it is followed by a tremendous growth of rank grass, an ideal breeding ground for the plague. Once on a muggy, close evening, attempting to land with eight Indians from a York boat, the very weight and density of the mosquitoes drove us back into the boat; then, each taking a blanket and forcibly beating the swarms with them we managed to get the kettle boiled, but were only too glad to retreat to the middle of the river to eat in comparative peace. No

one thinks of travelling in the summer months without a mosquito bar for each traveller and these hung inside a good tent makes living possible.

The reader can imagine my horror to find that Mrs. Missionary had no mosquito bar, having come from a rocky part of the country. Well, I could not see a woman and three little ones eaten alive, so I and the boy set a tent and bar up in the stern sheets and our first-class passengers had a good night of it, while us poor beggars in spite of two large smudges made in iron pitch kettles slept but a little or not at all and were only too thankful to see daylight come.

Our only hope of making connection with the lake steamer was to drift with the current day and night, so as Captain of the craft I had placed Antoine on night duty, I and the lad taking the sweep in the daytime. After another night of torment we were getting close to Chena-wa-wah at the west end of Cedar Lake. The Saskatchewan River here divided into several channels, these often changing with different seasons and as night was approaching we had either to tip up and wait for daylight or take extra precautions to keep the right channel.

There was fortunately a breeze which kept the flies away and we were nearly dead for want of sleep, so warning Antoine to keep a bright look-out we were sound asleep in two minutes. I was the first to waken, it being broad daylight and to my horror found we were out in a strange lake some distance from shore with no sign either of the Saskatchewan River or Cedar Lake. Calling all hands and reprimanding Antoine sharply for neglect of duty, which, indeed, might have very serious consequences, we held a council, that is the old man, boy and myself, right up in the bow, so as not to alarm our passengers. One thing certain we could not go back, and it was no use waiting for help, as no one might find us all summer. There was only one course—to go on. Then, in spite of Antoine's remonstrances, we hoisted the sail, there being a light breeze in our favor, and sailed on into the unknown. One comfort was that we were out of the dreadful marshes. There was a stony mainland to our right, no land visible to the westward and no mosquitoes, also a most beautiful morning, so I went aft and teased the little girls who were quite happy with the change from the river. We landed in a pretty bay for dinner and the family enjoyed a good wash. By this time the wind was freshening so away we went again, making famous time, the ladies quite unaware that we were off our course. After an hour or so of brisk sailing a narrow opening opened to the eastward and old Antoine crowded with delight, exclaiming, "There is Cedar Lake!" And sure enough it was. However our troubles were not yet over by any means as we would come out in the lake fairly close to the base of Rabbit Point, which nearly closes the east end of Cedar Lake, the route being along the east shore.

Forest Fires Revive

Fire Fighters In Maritime Provinces
Again Called Out.

St. John, N.B.—Strong westerly winds springing up, revived the forest fires at Westfield on the St. John River, and they were again sweeping toward the summer cottages at Hillandale.

Grand Bay is again covered with smoke, and it is impossible to see more than fifty yards. Fire fighters, who thought the danger had passed, and had been relieved from their work, were again called out to give battle to the blaze in the district.

Vancouver Merchant Dies In China.

Vancouver.—Sam Kee, wealthy Vancouver merchant and property owner, aged 64, while on a business visit to China, died after an illness of several months.

It pays to patronize home industry. Buy from the merchants in your own town.

Kidnapped Earl Is Liberated

Sinn Feiners Brought Earl of Bandon
Back—Uninjured.

Cork.—The Earl of Bandon, who was kidnapped on the morning of June 21, was brought back to Bantry by his captors. The aged earl, for whose safety there had been some concern at various times, was uninjured.

Since the kidnapping a constant search for the earl had been kept up. Latterly, however, it has been intimated that "as an earnest of good faith" the Sinn Fein would release him.

Invite Prince to Visit Japan.

London.—The Prince of Wales has received an official invitation from the Japanese Government to visit Japan at the conclusion of his tour of India, which, according to recent announcement is to begin about the end of October.

Value Of Experimental And Research Work As An Aid To Agriculture

Experimental and research work, promoted by, and under the guidance of, the Dominion Department of Agriculture, has made great strides in Canada during recent years. It is estimated, for instance, that the discovery of Marquis wheat by the Cereal Division of the Experimental Farms Branch has enriched the wheat growers of the three prairie provinces by \$20,000,000 annually, and that the introduction of Preston, Stanley and Huron wheats into the other provinces has brought about a gain of at least half a million dollars yearly. But wheat is not the only grain that has profited immensely through the work carried on at the Experimental Farms. By the introduction of Daubeny, Victory, and in particular Banner oats, a gain has been made of over \$9,000,000 annually, while other new grains, such as barley, flax and peas, have proven responsible for an increase in value of \$3,000,000 annually. All of these must and will develop in still greater profit to the country. Experiments in plant breeding work with garden and field crops have led to the discovery of many new varieties, such as the Melba Apple, Early Malcolm Corn, Alacrité Tomato, etc. Hardy varieties of tree fruits have been proven of good growth in the prairie provinces, while some valuable discoveries have been made in forage crops, notably a perennial red clover. Immensely valuable research work has been done by the Division of Chemistry, and by the Division of Botany, and by the Health of Animals, Entomological and Seed Branches. Canada has been shown to be the healthiest of all countries in livestock, a fact which must be attributed in large measure to the excellent system of supervision and control adopted and followed by the Health of Animals Branch. By its precautionary measures and other activities it is conservatively calculated the Division of Botany has saved the country \$32,000,000 annually, largely by its crusade against smut and its control of late blight and rot of potatoes and other diseases to which plant life is subject. Research work in its laboratories by the Seed Branch has resulted in approximately 100,000 tons of screenings being made of maximum value to the livestock feeder and this is but one of the profitable results that have been achieved. Turning to the Entomological Branch, when it is stated that to field crops alone a justifiable estimate is that the depredations of insects cause a loss each year of \$125,000,000 some idea of the colossal work involved can be formed. In field husbandry, by the greater use of crop rotations and the ascertaining of the most profitable rotations for each district, it is estimated that Ontario is benefitted annually to the extent of \$32,000,000, while by summerfallowing, a system urgently encouraged by the Experimental Farms Branch, the prairie provinces are thought to gain \$90,000,000 annually. These few facts will illustrate the advance that is being made in the development of Canadian agriculture.

Saskatchewan Creameries.

In 1920 forty-seven creameries operated in Saskatchewan produced seven million pounds of butter. Five new creameries are in course of erection at Yorkton, Assiniboia, Weyburn, Shannavon and Empress. There is only one cheese factory in the province which produced 28,367 pounds of cheese last year.

"Made In B.C." Campaign.

The "Made in British Columbia" campaign is gaining in popularity and, according to the secretary, three thousand families in the province have already pledged themselves to use only British Columbia made goods, with the expectation of two thousand additional pledges this week.

Indian Cadet Corps.

Major Millar, of Calgary, is authority for the statement that the cadet corps of Blood Indians is the smartest and most advanced corps in the province. This following his annual tour of inspection.

W. N. U. 1377

British Stock Breeder Surprised

Canada Can Supply England With Finest Grade of Beef Cattle.

Members of the Chrystal party of British stock breeders and dairymen, who have been investigating the possibilities of the cattle industry, as a field of supply for the British market, said that what they had seen led them to arrange to give an order for at least 2,000 head of cattle, if the embargo is lifted.

S. R. Jaggard, of Norfolk, and James Alston, of Leicestershire, both of whom are known as very large feeders in the Old Country, are more than enthusiastic over what they saw in Calgary. Mr. Alston declared: "We never expected to see at the Calgary show anything like we did see. It was a magnificent show of the finest purebred stock. But we are not after purebred stock. We want more of the ordinary type of beef cattle. And I can assure you we have seen all kinds and plenty of the finest kinds of very good cattle. They would be welcomed in England. Yes, they are the equal of anything that comes into our markets. You need have no fear about any of the splendid cattle we have seen in many places, particularly in Alberta, not being acceptable to graziers in the Old Country. We are pleased beyond our expectations, which really did not lead us to believe that the country has such a fine grade of first-class beef cattle, just what England wants. Once the embargo is lifted, and you need have no fear about that—it will be lifted—and once it is, Mr. Jaggard himself will order 2,000 head from Western Canada to be shipped at once."

France Objects To German Films

Invasion of Cinema Field Alarms French Producers.

A German invasion of the French cinema field is under way. Several films of German origin, but bearing Swedish, Italian and even American titles, were snapped up last month when offered at prices about 50 per cent. of what the French producers are asking. They will be shown all over France, and a loud outcry has been made by the French producers. The theatrical world now is aroused over the report that Goldstein, the Russian who recently acquired the Apollo Theatre, intends making a specialty of Viennese and Berlin music, with a new comic opera by Franz Lehar as the biggest feature next season.

Ranching in the North

Ideal Country For Ranching in the Peace River District.

There is no more ideal ranching country in the Dominion of Canada than that lying along the Keg River and adjacent streams in the Peace River in the belief of Frank Jackson, who owns what is considered the finest ranch in the north country. This is located about halfway between Peace River Crossing and Fort Vermillion. He has the inconvenience of having to travel 250 miles for his mail, but states enthusiastically that the beauties of the ranch, the excellency and extent of the pasturage, and the climate of the district, are more than ample compensation.

Resources Of Labrador

Have a Waterfall that Eclipses Niagara Is Report at Ottawa.

Canada and Newfoundland are to ask the privy council to settle their dispute as to the ownership of 250,000 square miles of territory in Labrador, and to a young Toronto lawyer, Charles Percy Plaxton, has been entrusted the task of preparing Canada's case for presentation to the law lords. Mr. Plaxton is an official of the department of justice. A party of 70 will survey the disputed territory and make inquiries as to the mineral and other resources of the country. One report is that there is a waterfall in Labrador that eclipses Niagara.

Innovations In British Air Express

Many Novelties Introduced for In- formation of Passengers.

A new De Havilland eighteen Continental "air express" plane, improved in details, has come into service on the London-Paris airway, according to an aeronautical correspondent of the London Times. It is now calculated that with a fleet of such machines, operating constantly on a route like London-Paris, a full load of passengers can be carried by air at a maximum speed of 13 miles an hour, and an average "cruising" speed of 108 miles an hour, for a total cost per passenger per mile of not more than 3½d., which is the rate of the first-class railway fare in England.

One of the innovations in this new express plane is a printed list, displayed in the saloon, of hints and instructions for air travellers. They are informed, for example, that the machine is inherently stable; that if a few "bumps" are experienced, these will be due mainly to wind-gusts, and should in no way inspire fear. The passenger is recommended also to relax himself; to take things easy; to sit comfortably in his chair, rather than to hold on tight. It is pointed out that it is permissible to move about the saloon—this making no difference to the stability of the machine, as some nervous passengers seem to think it might.

Another airway novelty has just been introduced on the express route between London and Amsterdam. A map of the airway, shown in detail right from London to Amsterdam, is placed in the saloon of the aeroplane, and, by means of an indicator actuated by the pilot from his driving seat, passengers are informed from minute to minute of the exact section of the route over which the aeroplane is flying.

Countess Bernstorff Will Get Property

Millions Seized By U.S. Must Be Restored.

Property valued at approximately \$1,000,000 will be returned to Countess Jeanne von Bernstorff, wife of Count Johann von Bernstorff, former German Ambassador to the United States, under a ruling by Justice William Hitz, in the District of Columbia Supreme Court.

By the order of the court Thomas W. Miller, Alien Property Custodian, is directed to restore to Countess von Bernstorff all the bonds and cases seized from her under the provisions of the trading with the enemy act.

Countess von Bernstorff brought suit to recover the property early this year, contending that by birth she was an American citizen, and that the property seized by the government was handed down to her by inheritance from her father, Edward Luckemeyer, formerly a silk merchant of New York, while she retained her citizenship as an American.

Experimenting With 900-Year-Old Seed

Corn Taken From Ruins In Arizona Looks Fresh.

The Rev. M. M. Stolz, librarian at the Kansas Wesleyan University, has received from Frederick Brorson, a graduate of the school, some relics from the ruins of Mesa Verde, in Arizona, which will be placed in the university museum. Among them are some corn, corn cobs and beans which were taken from under rocks where scientists say they have been for 900 years.

The cobs look as if they had been picked this year and the corn and beans are apparently in a perfect state of preservation. Dr. Stolz has planted some of the corn and beans and he declares that he believes they will sprout and grow.

Increased Imports.

There was an increase of more than eleven and a half million dollars in the value of imports to Canada during the twelve months ending May 31st, 1921, as against the previous period. At the same time the exports of Canadian produce from Canada showed a decrease of more than \$52,000,000. The total value of imports to Canada in the period under review was \$1,162,160,362, and of exports \$1,178,948,956.

Necessity For Trees On The Prairie Farm Should Be Recognized

Missionaries Going To Loneliest Island

English Curate and Wife Have Offer- ed Their Services.

The Rev. Henry Martyn Rogers, curate-in-charge at Alexton, Uppingham, Rutland, England, and his wife have volunteered to go to Britain's loneliest possession, Tristan do Cunha, a little island in the South Atlantic, to act as priest and schoolmaster. There are 119 inhabitants on the island, which is 1,512 miles west of Capetown, and is visited only once a year by a British warship, and on remote occasions by passing vessels.

Friends of the islanders in England are now wondering how to get Mr. and Mrs. Rogers there. No vessels are likely to call for many months, and the organizers of the Tristan do Cunha Society at 15 Tufton Street, London, S.W., are seeking someone who will lend or charter a whaler for the journey.

The islanders have no laws and know no crime. They do not barter and during the whole of last year the only sum of money on the island was 5s. Tea, cocoa and flour are rare delicacies.

Hollanders in Alberta

Have Been Arriving in Some Num- bers Since the Spring.

Alberta is a favorite location with emigrating Hollanders according to indications and mixed farming, to which the province is so adapted, attracts them. They have been arriving in some numbers since the spring and settling on the land, whilst many more are due to arrive this summer. A recent party of arrivals numbered sixty-five, practically all being in possession of sufficient capital to make an immediate start on farming operations.

Assisting Industries

British Columbia Government Well Pleased With Results of New System.

The experiment of assisting industries by government loans has been successful commercially, according to D. B. Martyn, Deputy Minister of Industries for the province of British Columbia, who states that there has only been one failure. Two industries made possible by government assistance, a woollen mill and a paper roofing company he cites as outstanding proof of the advantages of provincial government aid.

Large Sums For Railway Equipment

Six Million Is Needed to Move West- ern Crop this Autumn.

During the next two months the Canadian National Railways will spend \$6,000,000 in preparation for the handling of Western Canada's bumper crop this fall, according to announcement made by A. E. Warren, general manager of Western Lines. Section gangs all over the west will be increased, ballast trains will be operated, and much employment provided by works authorized, it is said.

It is said everything will be done to have the tracks in first class shape to handle a record number of cars of grain going to eastern seaboard.

Cheap Real Estate.

The price that the United States Government paid Denmark for the Virgin Islands was approximately about \$205 an acre. The Philippines cost an acre about 27 cents, Florida 14 cents, and Alaska 2 cents.—Youth's Companion.

At The Crossroad.

At a crossroad it is better to sound your horn and put your foot on the brake than to step on the accelerator and try to beat the other fellow across.—Youth's Companion.

That a person can live and thrive without a stomach is the theory of a French medical expert.

(By Archibald Mitchell, Western Lecturer, Canadian Forestry Association.)

Of the necessity for trees on the prairie farm it should not be necessary to write. One has only to live a few months on the prairies to know how welcome a shelter is when the wind is blowing. We are glad to see the chinooks in winter. We look upon them as a special blessing after a spell of thirty below, but they are all the better when you can enjoy the balmy weather they bring behind the shelter of a well-arranged belt of trees.

Then there is the dust. In this country, as in other dry countries, the dust, like the poor, is always with us. Tree belts stop a tremendous lot of dust. At least the smother from the neighboring summerfallow never reaches the houses when there is a substantial shelter between them and the west wind.

And temper and nerves! There is no telling the difference a few trees make. No wonder some poor women get discouraged and, indeed, almost distracted at times when the wind comes sweeping down, the washing blows away and everything goes wrong at once. Two or three days of steady high wind have an uncanny power to rattle one's nerves; there's no mistake about it.

I never saw so much genuine tree planting interest amongst prairie farmers as this year. In just one district of Southern Alberta, this spring, Mr. Roy Walker, of Vulcan, planted a mile and threequarters of trees on the west of his farm, using 25,000 trees. The Staples farm at Vauxhall has planted 20,000 and a party near Irricana has put in 16,000. Great numbers of farmers to my knowledge are preparing their ground this year for next year's tree planting. These are the beginning which I believe will develop into a country-wide practice of systematic prairie forestry.

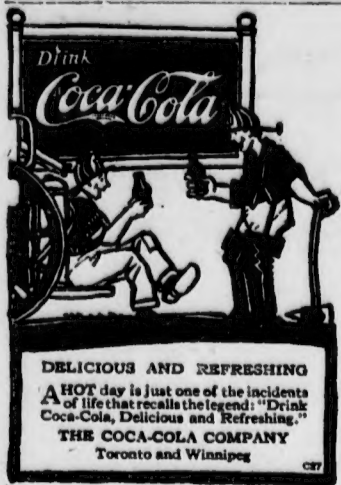

Nor is success limited to the districts of liberal moisture, or the irrigated sections. Just as striking successes have been scored in districts where tree planting appeared hopeless. N. J. Anderson, of Barnwell, Alberta, gave up the attempt to prepare a dust blanket over his land as a means to preserve moisture and turned for relief to tree planting. He lives in a naturally dry area which next year will have irrigation. He planted 5,000 trees of Russian poplar, ash, maple and willow. It took Mr. Anderson and a helper just four days to complete the job. Not 25 of the whole number died. After four years, his shelter belt is from ten to twelve feet high. In 1918, and 1919 when there was so little moisture that grain failed to thrive, the trees grew from six to eight feet. Today, Mr. Anderson is drawing big dividends from his shelter belts in the form of freedom from soil drift, he grows fine crops of vegetables and leads an incomparably happier life as a farmer.

Some settlers say: "I can't spare the time for tree planting." My reply is: "An acre of 1,800 trees, planted 4 by 6 feet, is the work of a man and a team for one day. What is three days switched out of the middle of seeding time and tacked on to the end of it? John Smith and Tom Brown with similar fields come out at the end of the season with similar yields, but Smith having taken a couple of days for tree planting has a fine young forest to boot. That is the story in a nutshell. Very few men lack the time. And exceedingly few, if any, localities can offer as a legitimate excuse that they are too dry for trees to thrive."

Farm Help Needed.

There is plenty of employment for experienced farm help or for Old Country farmers who are emigrating to Western Canada, according to officials of the Regina employment offices. The market for trade and industrial classes is congested but many agriculturists can be absorbed.

Our slogan for the coming year should be, "Buy at Home." Add to your own and your neighbor's prosperity by keeping the money circulating in our own district.

DELICIOUS AND REFRESHING
A HOT day is just one of the incidents of life that recalls the legend: "Drink Coca-Cola, Delicious and Refreshing."
THE COCA-COLA COMPANY
Toronto and Winnipeg

World Happenings Briefly Told

Major G. Hedley Basher, governor of Toronto jail for the past two years, has resigned.

The famous pipe of peace of the Indian chief, Sitting Bull, has been presented to the South Dakota State Historical Society.

A half billion candlepower searchlight, whose rays can be seen 70 miles away, is being installed on Mt. Tamalpais, near San Francisco.

A large number of Armenian children are suffering from heart disease due to the fear they have been living in.

The Prince of Wales has declined all public engagements during August and September in order to obtain a much-needed rest before his visit to India.

There has been practically no rain in the south of England for two months, and the highest temperatures for the past 40 years have been recorded for June and July.

The Allied Supreme Council probably will meet toward the end of this month, either in Boulogne or in Paris, it was announced by the French foreign office.

The Pacific Cable Board is reinstating the deferred press services between England, Canada and Australia, which was discontinued during the war.

Forty-one wells are now being sunk in Alberta in search of oil and these will be considerably increased as soon as the necessary equipment can be secured.

Forest fires in Quebec are now under control, according to G. C. Piche, chief forester. "The extent of the damage has been greatly exaggerated," Mr. Piche said.

A fire which broke out in the Blohm and Voss Shipyards at Hamburg caused damage amounting to many millions of marks. The timber sheds with great quantities of building material were destroyed.

YOUNG WOMEN AVOID PAIN

This One Tells How She Was Benefited by Taking Lydia E. Pinkham's Vegetable Compound.

Regina, Sask.—"For two years I suffered from periodic pains and nausea so I was unable to get around. My mother had me take Lydia E. Pinkham's Vegetable Compound, and I am much better and able to go about all the time, which I could not do before. I recommend Vegetable Compound to my friends if I know they suffer the same way, and you may publish my letter if it will help any one, as I hope it will."—Miss Z. G. BLACKWELL, 2073 Osler Place, Regina, Sask.

If every girl who suffers as Miss Blackwell did, or from irregularities, painful periods, backache, sideache, dragging down pains, inflammation or ulceration would only give this famous root and herb remedy a trial they would soon find relief from such suffering.

It hardly seems possible that there is a woman in this country who will continue to suffer without giving Lydia E. Pinkham's Vegetable Compound a trial after all the evidence that is continually being published, proving beyond contradiction that this grand old medicine has relieved more suffering among women than any other medicine in the world. For special advice women are asked to write the Lydia E. Pinkham Medicine Co., Lynn, Mass. The result of forty years experience is at your service.

Record Parachute Drop For Women

Eighteen-Year-Old Girl Says Experience Was Terrible.

Miss Phoebe J. Fairgrave, 18 years old, of St. Paul, Minn., established what was said to be a new world's record for a parachute drop for women, when she dropped 15,200 feet from an airplane at Curtiss Flying Field. The previous record was said to have been 11,000 feet, held by Miss Mabel Cody, set at Chicago last February. The altitude was recorded by an altimeter, according to Paul Goldsborough, of the Aero Club of Minneapolis who, with V. C. Omlie, pilot, went up in the plane with Miss Fairgrave.

It took exactly 20 minutes from the time Miss Fairgrave leaped until she alighted safely in a wheat field near New Brighton.

"It was terrible," said Miss Fairgrave later. "I never want to try it again."

The Origin Of Gall Stones

They are simply dried bile made up of Crystalline constituents of that fluid. Very common is this disease among merchants, clergymen, shop girls, and those of sedentary habits. Prevention consists in maintaining correct action of the liver and bowels, and this is speedily accomplished by using Dr. Hamilton's Pills. No person using Dr. Hamilton's Pills will be subject to bilious fits. Sound digestion, good appetite, a clear color will evidence the health-giving properties of Dr. Hamilton's Pills which are safest and best for general family use. When a laxative is needed, when you feel out of sorts, that's the time to use Dr. Hamilton's Pills of Mandrake and Butternut, 25c all dealers or The Catarrhzone Co., Montreal.

Not Far To Go.

Exasperated Husband.—If you don't stop your nagging I'll go crazy in a minute.

Sarcastic Spouse.—You could make it, all right and not exceed the speed limit, either.

Hall's Catarrh Medicine

Those who are in a "run down" condition will notice that Catarrh bothers them much more than when they are in good health. This fact proves that while Catarrh is a local disease, it is greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE is a Tonic and Blood Purifier, and acts through the blood upon the mucous surfaces of the body, thus reducing the inflammation and restoring normal conditions. All druggists. Circulars free. F. J. Cheney & Co., Toledo, Ohio.

Plan Your Vacation Trip

Special Summer Tourist Fares to the Pacific Coast.

Special Summer Tourist tickets to Vancouver, Victoria, Seattle and other Pacific Coast points are now on sale daily by the Canadian Pacific Railway. These tickets will bear a final return limit until October 31st, and permit stopovers en route, which gives travellers an opportunity of visiting some of the beautiful resorts in the Rockies, such as Banff, Lake Louise and Glacier, where the Company maintain splendid resort hotels. These tickets are optional via the main line or Arrow Lakes route in one or both directions without extra charge. No expensive side trips necessary.

In addition to the "Trans-Canada Limited" exclusive sleeping car train, a choice of two other daily trains is offered, and as all are equipped with open-top observation cars through the mountains an excellent view of the magnificent scenery may be had.

Any Agent of the Canadian Pacific will be pleased to give further particulars and make the necessary arrangements for the trip.

Spend your money at home, thereby helping your own town and local merchants.

Always Ready and Reliable.—Practically all pains arising from inflammation can be removed with Dr. Thomas' Electric Oil. Simply rub it on the sore spot and it is quickly absorbed by the skin. Its healing power is conveyed to the inflamed tissue which is quickly soothed. This fine old remedy is also a specific for all manner of cuts, scratches, bruises and sprains. Keep a bottle handy always.

The New Idea.

Uncle Timseed.—I'm goin' to pull up at this watering trough, an' give the old nag a drink.

Sammy Sittibed.—Does his radiator need filling, uncle?

Minard's Liniment for Dandruff

Soap 25c. Ointment 25c and 50c. Talcum 25c. Sold throughout the Dominion. Canadian Depot: Lyness, Limited, 344 St. Paul St., W. Montreal. **Cuticura Soap shaves without mug.**

English Lake Disappears

Vanishes In a Night Down Old Colliery Shaft.

The lake in the park at Burslem, the "Bursley" of Arnold Bennett's "Five Towns," vanished in a night. The water disappeared through an old colliery air shaft, and nothing now remains but a sea of mud.

The property in the neighborhood of the park is now in a condition which is positively dangerous owing to recent mining subsidences. Great cracks have appeared in the walls and roof of the town hall, and a staff of workmen are endeavoring to repair the damage.

The Druggists All Agree

That "Putnam's" Is Best

The oldest corn remover on the market is Putnam's Corn Extractor, and it is the best. Your corns will all drop out after a few treatments with this painless remedy. Failure impossible. Refuse a substitute for "Putnam's," 25c everywhere.

Impolite Pedestrian.

A taxi-driver who knocked a man down in Gracechurch Street has summoned him for using abusive language. It seems a pity that pedestrians cannot be knocked down without showing their temper like this.—Punch (London).

THE HEALTHY MAN HAS THE BEST CHANCE

Is Always Full of Life and Energy—Failures Are Weak and Bloodless

Some men seem to have all the luck. If there are any good things going these men seem to get them. If they are business men they are successful; if they are workmen they get the foreman's job. They have the power of influencing people.

The same is true of women. Some have the charm that makes men seek them out; others are neglected. But this is not luck. It is due to a personal gift—vitality. Men and women of this sort are never weak, puny invalids. They may not be big, but they are full of life and energy. The whole thing is a matter of good blood, good nerves and good health. Everyone would wish to be like this and the qualities that make for vitality and energy are purely a matter of health. By building up the blood and nerves, sleeplessness, want of energy, weakness of the back, headaches and the ineffectual sort of presence which really comes from weakness can be got rid of. Dr. Williams' Pink Pills have made many weak, tired men, vigorous, and many pale dejected girls and women, rosy and attractive, by improving their blood and toning up their nerves. If you are weak, low-spirited or unhealthy, try Dr. Williams' Pink Pills and note their beneficial effect.

You can get these pills through any medicine dealer or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

The various currents in the North Sea are now being tracked by means of sealed bottles.

Patronize your local merchant and thereby help to build up your home town and community.

Gorgeous Colors In This Tea Gown

By Marie Belmont.

The union of exquisite materials and the combination of most wonderful colors are two of the reasons for the favor shown to the newest tea gowns. Over a foundation of lemon satin, panels of rust color velvet fall from the shoulders. These are edged with silver galloon. Wing-like sleeves that descend in cascade style introduce lettuce green chiffon. These are bordered with scintillating beads and their sharply cut facets reveal the glowing colors of the ruby, emerald and diamond. A piece of the silver galloon binds the hair and above each ear fall pendants of the various colored beads that bedeck the sleeves.

There is nothing repulsive in Miller's Worm Powders, and they are as pleasant to take as sugar, so that few children will refuse them. In some cases they cause vomiting through their action in an unsound stomach, but this is only a manifestation of their cleansing power, no indication that they are hurtful. They can be thoroughly depended upon to clear worms from the system.

Ice Capped Summits Of the Rockies

Traveller Affirms That the World's Biggest Show Is In Canada.

The most widely travelled globe-trotter living affirms that the greatest freak of Nature on this earth is the panorama of the Canadian Rockies, and that the greatest engineering achievement in the world is the Canadian Pacific Railway's passage of those mountains by means of a series of spiral tunnels which have reduced the original grade of 4.5 to less than half.

Thousands of men and women travel from the remotest corners of the globe to see this staggering upheaval of Nature; to gaze on its endless line of ice-capped summits piercing the clouds; upon its gorgeous colorings and shadowgraphs and to drink in its amazing atmosphere.

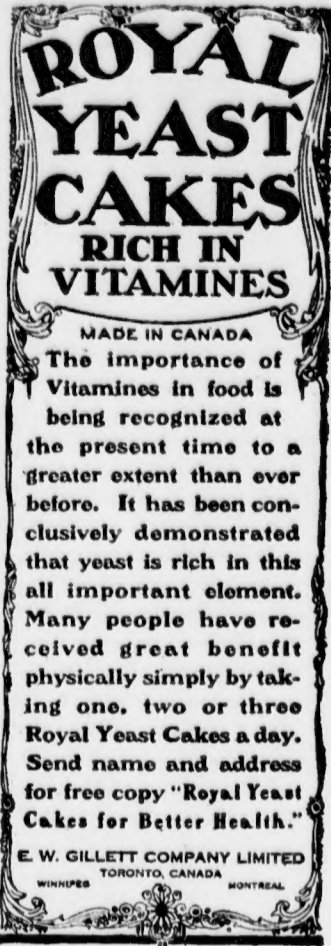

And yet ninety per cent. of the citizens of Canada have never seen this, their own show of surpassing grandeur and magnitude, which they could see and live with for a month, spending less than they might on a week's trip to Chicago or New York, and come home wiser and better men and women. How is it done? A post card to any Canadian Pacific Agent will bring you the surprise of your life.

The Oil for the Athlete.—In rubbing down, the athlete will find Dr. Thomas' Electric Oil an excellent article. It renders the muscles and sinews pliable, takes the soreness out of them and strengthens them for strains that may be put into them. It stands pre-eminent for this purpose and athletes who for years, have been using it can testify to its value as a lubricant.

The Greatest Menace.

There is not a menace in the world today like that of growing public indebtedness and mounting public expenditures.—President Harding.

Export of Grain.

In the seven fiscal years, 1915 to 1921, the total exports of grain from Canada amounted to 1,122,664,772 bushels, of which 818,696,828 were wheat. Of the total grain fifteen per cent. went to the United States and thirteen per cent. of the wheat was consigned to the same country.

No matter how deep-rooted the corn may be, it must yield to Holloway's Corn Remover if used as directed.

On the Free List.

"Beg pardon, sir," said the doorman at the exclusive club. "Haven't you made a mistake?"
"I reckon not," replied Farmer Giles. "The sign on the door says 'No admission,' and if there's no admission it's free, ain't it?"—London Ideas.

Minard's Liniment for sale everywhere.

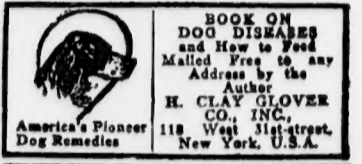

The crops destroyed by small rodents and insects in America would feed the people of Belgium. The great natural enemies of these pests of the farmer, fruit-grower and forester are the birds.
